FUNDING OPPORTUNITIES

GENERAL
1. Academy Of Social Sciences In Australia (ASSA) Joint-Action Bilateral Research Programs
2. Applications For AFAS ACT Science & Technology Post Graduate Travel Grants For 2011
3. Endeavour Research Fellowships
4. COMFRAB And Fishery Specific Research Opportunities 2010 For Projects Starting 1 July 2011
5. Fisheries Research And Development Corporation (FRDC) - Annual Competitive Cycle
6. Sustainable Tourism Cooperative Research Centre (STCRC) Performance Indicator Project And Funding
7. Australian Centre For International Agricultural Research (ACIAR) Grants
8. Criminology Research Council (CRC) Research Grants
10. Australian Leadership Award Fellowships
11. Australia-India Council (AIC) Grants

HEALTH SPECIFIC
1. Leukaemia Foundation National Research Program 2011
2. Heart Foundation Postgraduate Scholarships
3. Call For 2011 NBCF Breast Cancer Research Grants And Fellowship Applications
4. Australian Rotary Health Research Fund – Phd Scholarships
5. The 2011 Arthritis Australia National Research Program

SEMINARS, CONFERENCES, TRAINING AND INFORMATION
1. Public Forum - Centre For Water Research And Swanbourne Coastal Alliance Inc
2. AANSS 2010 Conference - Neutron And X-Ray Scattering – From Biology To Physics
3. 2011 Fulbright Symposium Applications
4. ORD Research Training

HELP, TOOLS AND TIPS
Please see this section for useful contacts, tools and tips.
FUNDING OPPORTUNITIES

GENERAL

1. ACADEMY OF SOCIAL SCIENCES IN AUSTRALIA (ASSA) JOINT-ACTION BILATERAL RESEARCH PROGRAMS
Academy of the Social Sciences in Australia (ASSA) Joint-Action Bilateral Research Programs aim to provide seed funding to teams of collaborating international researchers, including Early-Career Researchers (ECRs).

The grant is to provide AU$7,500 to the participants to meet and engage, initiate a new research proposal and to assemble preliminary data in support of a more ambitious funding proposal to major funding bodies.

Collaborative applications are sought from teams comprising one Australian researcher and one researcher from one of partner nations: Canada, Czech Republic, Denmark, Finland, Germany, Indonesia, Japan, Spain, Sweden, Taiwan, United Kingdom and Vietnam.

Applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Thursday 24th July 2010.

More information, and application forms, are available at - http://www.assa.edu.au/programs/international/jabrp/

2. APPLICATIONS FOR AFAS ACT SCIENCE & TECHNOLOGY POST GRADUATE TRAVEL GRANTS FOR 2011
To foster collaboration with France for post graduate research students, AFAS (Australian French Association for Science & Technology, ACT) and the Embassy of France in Australia are offering post graduate science and technology research students, residing or studying in the ACT, a unique opportunity to undertake training or a collaborative study with a French University or research body in 2011. The grant of $3,000 is a contribution to return airfares to France and living costs for the duration of the stay.

If the grant is to be administered via a Curtin cost centre, then applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Friday 20th August 2010.

3. ENDEAVOUR RESEARCH FELLOWSHIPS
The Endeavour Research Fellowships provide financial support for postgraduate students and postdoctoral fellows from Australia to undertake short-term research (4-6 months), in any field of study. The research must be undertaken in participating countries in the Asia-Pacific, Americas, Europe and Middle East.

The Endeavour Research Fellowships aim to:
- enable high achieving scholars from Australia to undertake research in the Asia-Pacific, Americas, Europe and Middle East
- further develop Award Holders’ knowledge and skills in their field of research
- strengthen bilateral ties between Australia and the participating countries
- showcase Australia’s education sector
- strengthen mutual understanding between the people of Australia and the Award Holders’ host country
- build international linkages and networks.

Applications for all grants and fellowships are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Friday 30th July 2010.

For more information and application forms please see - http://www.endeavour.deewr.gov.au/Australian_applicants/research_fellowships.htm
4. COMFRAB AND FISHERY SPECIFIC RESEARCH OPPORTUNITIES 2010 FOR PROJECTS STARTING 1 JULY 2011

The Commonwealth Fisheries Research Advisory Body (ComFRAB) assesses applications for funding of research for Commonwealth fisheries. In the 2010 research funding round ComFRAB is making a call for research, focusing on areas of research that have potential application across a number of AFMA fisheries. Also included, for the first time this year is the call for research identified by AFMA’s Management Advisory Committees (MACs) that address fishery-specific research issues.

Applicants for either process should use the project scopes listed in ComFRAB and Fishery Specific Research Opportunities 2010 (PDF, 73kb) as a guide when developing their pre-proposals to meet the identified need for the project.

To assist in quality control and to promote relevance of pre-proposals, applicants are invited to discuss their applications with AFMA’s Senior Manager – Environment and Research, Selina Stoute, on 02 6225 5317 or Selina.Stoute@afma.gov.au prior to submitting a pre-proposal.

Pre-proposal forms are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Tuesday 8th June 2010.

To complete a pre-proposal form please go to www.frdc.com.au/research.

Applicants will be advised in July 2010 whether they should develop their application into a full proposal. If you are asked to do so the full application is to be submitted to the Office of Research and Development, along with a revised RPAT no later than Wednesday 18th August 2010.

5. FISHERIES RESEARCH AND DEVELOPMENT CORPORATION (FRDC) - ANNUAL COMPETITIVE CYCLE

The avenue for most of the FRDC’s research and development funding is via an annual competitive cycle. FRDC recommends applicants follow the five steps, which outline what needs to be done as part of the application process.

Applications for research and development funding outside the annual competitive cycle may be considered by the FRDC Board only when it deemed urgent and addresses a high priority issue. For more information on the Annual Competitive Cycle contact staff in the Programs area.

Tactical Research Fund

The aim of the TRF is to allow the FRDC to provide investment funds to its stakeholders in a timely manner to take advantage of opportunities, avert threats, or manage unforeseen events, as they arise. A TRF project may be of an urgent ‘break-the-glass’ type; or, it could also be a project that is used to overcome significant hurdles in, or to significantly fast track, important stakeholder processes, including production. In these cases it is likely that the adoption and benefits will be significantly brought forward if the project had not been funded at all.

People Development

Applicants should read the information available on the People Development Program page or contact the Program Manager Neil Garbutt on (02) 6285 0400 to discuss project ideas prior to developing an application.

The FRDC encourages project applications that address one or more of the following priorities:

- Enhance industry leadership within, and across, all sectors
- Build industry capacity to drive change to achieve goals
- Provide opportunities for knowledge transfer and R&D adoption
- Build workforce capability

Social Research

Before applying applicants should read the information on the Social Sciences Research Co-ordination Program pages to ensure the research aligns with the programs key issues and research areas. If in doubt contact the Program Manager or relevant State/Territory Fisheries Research Advisory Body (FRAB), to discuss research options and proposals. All FRDC funding applications must be submitted by filling in the online application form at

Applications are via the Fishnet online application system - http://www.fishnet.gov.au
Applications for all grants and fellowships are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Monday 25th October 2010.

For more information please see - http://www.frdc.com.au/research/applyng-for-funding

6. SUSTAINABLE TOURISM COOPERATIVE RESEARCH CENTRE (STCRC) PERFORMANCE INDICATOR PROJECT AND FUNDING

The Sustainable Tourism CRC is currently seeking proposals from research teams to complete work on a research project aiming at developing a set of Australian tourism Sustainability Performance Indicators (SPI) which are relevant at national and regional levels.

Applications for all grants and fellowships are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Monday 31st May 2010. Apologies for the short notice.

The CRC proposes to contract the work prior to 30 June. They will also contract an industry body as Project Manager with the responsibility for progress approval and project payments. They will pass funding to the Project Manager to enable payments to be made on delivery of milestones. They expect that research will commence in July 2010 and there is an expectation that the project will be completed in a relatively short but reasonable timeframe – certainly less than 12 months.

For more information on the project please see - http://research.curtin.edu.au/local/docs/global/Update_09_STCRC-project.pdf

Or contact the Director of Research - david.simmons@crctourism.com.au

7. AUSTRALIAN CENTRE FOR INTERNATIONAL AGRICULTURAL RESEARCH (ACIAR) GRANTS

ACIAR supports partnerships that create opportunities for Australian researchers to work with overseas agricultural researchers on issues of common concern. Their major focus, as part of Australia’s overseas aid program, is to support research that contributes to sustainable agricultural development in the Asia-Pacific region.

Project proposals are welcomed throughout the year, rather than inviting submissions at a particular time. There is a standing invitation to all who share our commitment to research in sustainable agricultural development, both in Australia and in the region, to explore the possibility of an ACIAR-funded partnership.

The key to a good partnership is getting the foundations right. If you are thinking about developing a research proposal, you should discuss it with the appropriate ACIAR Research Program Manager at an early opportunity. Developing a full proposal takes time and a lot of commitment.

Interaction at an early stage about the idea, timing, funding, and how the project may fit into the overall program is very important. ACIAR will only commence the process of finalising potential overseas partners when there is a reasonable probability that the project can be funded. Also, proponents must ensure that research will not duplicate existing activities being supported by ACIAR or other international funding agencies.

ACIAR strives to implement project ideas that have proceeded through to full proposal stage, but circumstances can change. Their limited funding must target priorities already agreed with individual partner countries. The ACIAR Annual Operational Plan provides guidance on country priorities. It is crucial to the development of effective partnerships that two-way commitment is established with the partner country and matches agreed priorities. Talking with ACIAR’s Research Program Managers can help shape ideas into proposals that align with the Centre’s country priorities, strategies and programs and ensure duplication does not occur.

Applications for all grants and fellowships are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT.

To help you find the correct Research Program Manager to contact, a description of ACIAR’s programs and contact details are available at the ACIAR’s Research Programs page. For more information on the process for developing a proposal please see - http://aciar.gov.au/project_dev
8. CRIMINOLOGY RESEARCH COUNCIL (CRC) RESEARCH GRANTS

The 2010 round of the Criminology Research Council research grants are now open.

Grants are considered if they are public policy-relevant, have practical application, contribute to the understanding, prevention or correction of criminal behaviour and will make a substantial and original contribution to criminological knowledge. For examples of previous grants, see current and recently completed grants at the link below.

A proposal that requires Ethics Committee approval may be considered by the Council if approval is still pending at the time of the Council’s meeting, in which case any grant will be conditional upon Ethics Committee approval being obtained. Applicants should take into account the time required for obtaining Ethics Committee approval in framing timelines for projects. Applicants may use any NH&MRC approved Institutional Human Research Ethics Committee.

Applications for all grants and fellowships are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT no later than Friday 13th August 2010.

For more information please see - http://criminologyresearchcouncil.gov.au/applications/index.html

9. DIGITAL REGIONS INITIATIVE

Please see the information below. While Curtin itself is not able to apply directly for funding, it may be possible to access funding by partnering with an eligible organisation. If partnering with an eligible organisation it is not necessary to provide an RPAT until the project is successful. However, it is expected the Curtin portion of the project is correctly costed to include cost recovery.

The four-year $60 million Digital Regions Initiative co-funds innovative digital enablement projects with state, territory and local governments. It takes a collaborative approach to improve the delivery of education, health and/or emergency services in regional, rural and remote communities.

State, territory and local governments seeking funding under the Digital Regions Initiative are required to provide matching funding. This enables projects of greater scale, coverage and benefit to regional Australians.

The Digital Regions Initiative commenced in 2009 and concludes in 2013.

On 18 May 2010, Senator Conroy released the program guidelines for round two of the Digital Regions Initiative and invited state, territory and local governments to develop projects for funding that are consistent with the aim and principles of the program.

Potential applicants for round two are invited to lodge an expression of interest through the online form provided. The expressions of interest online form will be available until 5.00 pm EST 10 June 2010. Expressions of interest will be published on this website to promote collaboration between projects and project applicants.

The online application system for round two of the Digital Regions Initiative will be accessible through this website and will be made available by no later than 7 June 2010 and remain until 5.00 pm EST on 14 July 2010.

The Department is holding information sessions on round two of the Digital Regions Initiative in a number of locations across Australia.

What types of projects are funded under the Digital Regions Initiative?
The Digital Regions Initiative co-funds digital enablement applications to improve services in the key sectors of health, education and/or emergency services in regional, rural and remote communities across Australia in partnership with state, territory and local governments.

The Digital Regions Initiative supports projects that will deliver innovative and sustainable services to:
- boost innovation in healthcare by enabling services such as remote consultation, diagnosis and treatment in areas where there are specialist skills shortages
- extend digital education services to enable more regional, rural and remote communities to access improved educational opportunities
- increase the use of digital technologies to improve emergency and disaster response both within and across state and territory borders.

For more information on Research at Curtin please visit the research website www.research.curtin.edu.au
Who is eligible to apply for funding?
State, territory or local governments can apply for Digital Regions Initiative funding. Private and not-for-profit organisations can partner with eligible organisations.

For more information please see -
http://www.dbcde.gov.au/all_funding_programs_and_support/digital_regions_initiative

10. AUSTRALIAN LEADERSHIP AWARD FELLOWSHIPS
The ALA Fellowships 2010 round is now open— for priority areas of study and eligible countries within Asia Pacific, Latin America, Carribean, Iraq, Palestinian Territories and Africa.

ALA fellowships are intended for those who are already leaders or have the potential to assume leadership roles that can influence social & economic policy reform and development outcomes. These highly flexible fellowship arrangements can be between university to university (or from university to partner organisation) AND for groups of short term fellows. Curtin can initiate the application (or co-host with an Australian organisation eg: Ministry of Agriculture, Landgate). Applications are restricted to Australian organisations demonstrating on-going linkages with counterpart overseas organisations in the eligible countries.

To qualify, organisations will be required to demonstrate region-specific linkages and the relevance of the proposed programs to the priority areas.

Applications for all grants and fellowships are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT no later than Friday 18th June 2010.

For more information please see - http://www.ausaid.gov.au/scholar/alafellow.cfm

11. AUSTRALIA-INDIA COUNCIL (AIC) GRANTS
The Australia-India Council (AIC) welcomes funding applications from individuals and organisations in Australia for projects which are likely to promote long-term contact and cooperation between Australia and India. AIC grants are intended to provide seed funds for innovative proposals relevant to the mission and goals of the Council. Please note that this is not a funding source specifically designed for research. In fact, projects that the Council consider should be funded by the ARC or other research bodies will not be eligible, so the onus is on an applicant to show there is a direct and broadly based benefit for Australia-India relations.

The Council gives priority to projects in the following areas:
- The Arts (including literature and film)
- Education
- Social initiatives (including public health and sport)
- Science/Technology/Environment
- Public Policy Activities (including media links)

The Council will also consider applications for funding support for a limited number of projects and activities in other areas consistent with Council objectives.

All funding applications are made using standard documents and are assessed by a standard appraisal procedure, helping to ensure consistency and equity in Council funding decisions. While grant amounts will be considered on a proposal basis, major grant funding of AUD 20,000 or more for any single activity will only be provided in exceptional circumstances and where the Council decides the project will become a priority activity of the AIC in that financial year.

To save unnecessary effort, applicants are encouraged to submit an Expression of Interest first.

The Council’s intention is to hold three grant funding rounds each year, with closing dates in March, July and November. This is to permit the AIC Board to consider the applications at meetings usually scheduled for April, August and December.
Applications should preferably be made at least six months in advance of the starting date of the proposed activity. There is no guarantee about the level of funding available for each round, but it should be noted that there may be less funding available later in any given financial year.

HEALTH SPECIFIC

1. LEUKAEMIA FOUNDATION NATIONAL RESEARCH PROGRAM 2011

Applications for the Leukaemia Foundation National Research Program 2011 are now open.

In 2011 the Foundation is calling for innovative research applications for Grants-in-Aid, Fellowships and Scholarships.

They will consider funding applications in all fields of research which will improve outcomes for people with blood cancers and related disorders.

Applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than 5 workings days prior to the Leukaemia Foundation closing date.

2. HEART FOUNDATION POSTGRADUATE SCHOLARSHIPS

Applications are now open for the Heart Foundation Postgraduate Scholarships.

Significant changes to the eligibility criteria, instructions and application forms for Heart Foundation Postgraduate Scholarships have been made and are relevant to the 2010 funding round onwards.

A summary of the major changes are as follows:

- Only applicants who have yet to commence their PhD (or an equivalent degree) or have completed less than 12 months of work towards their PhD at the time of application are eligible to apply for a Heart Foundation Postgraduate Scholarship.
- The Scholarship form is now separated into Part A and Part B.
- Two sets of supporting documentation must be included as two separate PDF files (Supporting documentation File 1 and Supporting Documentation File 2).
- Referees’ reports must be included with the application as part of Supporting Documentation File 2.
- Direct submission of referee reports by the referees to the Heart Foundation will no longer be accepted and therefore will not be forwarded on for assessment.
- All applications for extensions must be submitted by 1st September each year, and applicants must be within 3 years of their original starting date of their PhD at the time of application for an extension. A maximum of 6 months may be requested and approvals may only be provided by the Chair of the Scholarships Committee and the Research Program Director.
- If you are successful for co-funding with the NHMRC in 2011, the Heart Foundation shall abide by the terms and conditions set out by the NHMRC.

For further information, please download the instructions to applicants booklet plus the new application forms (PART A and PART B) by clicking here.

Applications are to be submitted to the Scholarships Office within the Office of Research and Development, later than Friday 20th August 2010.
3. CALL FOR 2011 NBCF BREAST CANCER RESEARCH GRANTS AND FELLOWSHIP APPLICATIONS
National Breast Cancer Foundation is now accepting applications for the following breast cancer research grants. NBCF is committed to supporting and promoting quality breast cancer research.

NBCF annually reviews the grant portfolio in consultation with its Research Advisory Committee to ensure that funding is targeted to key areas of need. This year, the grant portfolio will focus on supporting rising young investigators and the development of innovative and collaborative breast cancer research.

For details on application closing dates, please visit the NBCF website Research Calendar.

Calling for NBCF Postdoctoral Training Fellowships
Applications are now open for the NBCF Postdoctoral Training Fellowship. We are delighted to welcome Cure Cancer Australia Foundation this year as co-funding partner for NBCF Postdoctoral Training Fellowships.

The application form and guidelines are available for download by clicking here.

Calling for NBCF Early Career Fellowships
Applications are now open for the NBCF Early Career Fellowship.

A new application form and guidelines document are available for download by clicking here.

Applications for all grants and fellowships are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Friday 18th June 2010.

4. AUSTRALIAN ROTARY HEALTH RESEARCH FUND – Phd SCHOLARSHIPS
The Australian Rotary Health Research Fund has announced several funding opportunities for Phd students:

- investigating Childhood Cancer.
- Investigating Motor Neurone Disease

These opportunities are offered under the ARHRF Funding Partner Program which is a three-way financial commitment between a co-funding Rotary Club or District, Australian Rotary Health and the administering university of research institute. ARHRF is currently funding over 50 students Australia-wide with research funding totaling over $1,000,000 in medical and mental health research.

Applications are to be submitted to the Scholarships Office within the Office of Research and Development, no later than Friday 25th June 2010.

More information on these Phd Scholarships can be found at - http://www.australianrotaryhealth.org.au/Information-About/Research/Current-Opportunities.aspx

5. THE 2011 ARTHRITIS AUSTRALIA NATIONAL RESEARCH PROGRAM
The 2011 Arthritis Australia National Research Program is now open, and will be available to clinical, scientific and allied health professionals who work in universities, hospitals and recognised research institutes.

Grants valued between $10,000 and $50,000 for one year are available in the following categories:

- Fellowships
- Scholarships
- Grants In Aid and Project Grants

Applications for all grants and fellowships are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Friday 2nd July 2010.

For further information please visit the Research Grants page on our website www.arthritisaustralia.com.au
SEMINARS, CONFERENCES, TRAINING AND INFORMATION

1. PUBLIC FORUM - CENTRE FOR WATER RESEARCH AND SWANBOURNE COASTAL ALLIANCE INC

You are invited to a public forum:

“Real time monitoring of our estuary and coastline: understanding the impact of the dredging at Fremantle Port on the coast and the Swan-Canning River Basin”

The Centre for Water Research based at The University of Western Australia has developed and implemented a real time monitoring system that provides the public of Western Australia with information in real time about impacts of development, climate change, effluent disposal, nutrient enrichment and pathogen dispersal on the coast and the Swan-Canning River Basin. The wholly developed Western Australian technology is a world first and is currently monitoring the impact of the dredging at Fremantle Port on the Swan-Canning River Basin and the coastal ocean receiving waters. (A joint project with the Curtin Water Quality Research Centre, Curtin University of Technology and Millennium Kids)

The Speaker: Professor Jorg Imberger has received numerous local, national and international recognition for his work. His awards include the 2009 Premier’s Scientist of the Year (WA), Stockholm Water Prize (Sweden), Onassis International Prize (Greece), Order of Australia (Australia) and the Redfield Life Time Achievement Award (USA). He is also a Fellow of the Royal Academy of Engineering (UK), American Geophysical Union (USA), Australian Academy of Sciences and the Australian Academy of Technological Sciences. Jorg has also led scientific projects in Australia, US, Germany, Italy, Japan, Singapore, Kenya, Mexico and Argentina.

Date/Time: Thursday, June 10th, 2010 at 6.00 p.m.

2. AANSS 2010 CONFERENCE - NEUTRON AND X-RAY SCATTERING – FROM BIOLOGY TO PHYSICS

The 2010 AANSS conference will be held between Wednesday 1 December – Friday 3 December, AINSE, Lucas Heights.

The deadline for Abstracts is Friday 17th of September 2010.

The topics of AANSS 2010 include:

- Condensed Matter Physics
- Biological Sciences
- Soft Condensed Matter
- Instrument Concepts/Techniques/Developments
- Chemistry/Earth Sciences
- Engineered and Applied Materials
- Medical and Imagery
- Software

The Organising Committee:

- Ted Baker, Auckland University, New Zealand
- John Carver, University of Adelaide, SA, Australia
- Lizhong He, The University of Queensland, QLD, Australia
- Trevor J. Hicks, Monash University, VIC, Australia
- Brendan Kennedy, The University of Sydney, NSW, Australia
- Christopher D. Ling, The University of Sydney & Bragg Institute, NSW, Australia
- Rhiannon Still, AINSE, NSW, Australia (Conference Coordinator)
- Moeava Tehei, University of Wollongong, NSW, Australia (Conference Chair)

3. 2011 FULBRIGHT SYMPOSIUM APPLICATIONS
The Australian-American Fulbright commission is pleased to advise that applications are now invited to host the 2011 Fulbright symposium.

The Australian-American Fulbright Commission will offer a grant of $30,000 to the successful organisation selected to host the 2011 Fulbright Symposium.

The Fulbright Symposium should address a current topic of bi-national interest between Australia and the United States and engages leading speakers from both countries. The aim of the Fulbright Symposium is to support the Fulbright Commission's mission of promoting mutual understanding between the peoples of the United States and Australia through educational and cultural exchange.

The Fulbright Symposium is to be held between 1st March and 30th September 2011 and would be known and promoted as the Fulbright Symposium in all publicity. The grant is a contribution towards the costs of organising and hosting the Symposium.

Applications close Monday 2 August 2010

4. ORD RESEARCH TRAINING SEMINARS

SCRIPT Research Project Module Training
Please note that there are not currently any face to face training sessions scheduled for the SCRIPT Research project module. However, staff can access this training via an ilecture. This is available for viewing at http://research.curtin.edu.au/seminars/research.cfm#researchmodule. Please note that you will be required to complete and submit a short questionnaire to ORD after viewing the ilecture. Upon processing of the questionnaire you will then be given access to the Research Projects module itself. Further details and the Training Guide are available via the link above.

Please also note that ilecture recordings of previously delivered seminars can be accessed via the ORD website (http://research.curtin.edu.au/seminars/notes.cfm). Some of the topics recorded are:

- Demystifying Research Publication Citations And Impact Factors
- How to Find Research Funding Sources
- How Write a World Class Paper
- Preparing NHMRC Rejoiners
- Preparing ARC Rejoiners
- Building Your Research Career
- An Introduction to Budgeting and Managing Research Projects
- Finding Research Funding Sources
- An Introduction to Conducting Research at Curtin
