For more information on Research at Curtin please visit the research website www.research.curtin.edu.au
FUNDING OPPORTUNITIES

GENERAL

1. AUSTRALIAN ACADEMY OF SCIENCE – 2011 AWARDS AND GRANTS
The Australian Academy of Science’s Honorific Awards for scientific excellence are made to early-career researchers under 40 and to career researchers for life-long achievements.

The Academy also supports research through the sponsorship of conferences that focus on rapidly developing fields of research, the award of travelling fellowships for the exchange of scientific ideas, and awards to support research.

a) Honorific Awards
The Academy is inviting nominations for 2011 Medals and Prizes for early-career and career researchers.

Closing date – 30 July 2010
Website: http://www.science.org.au/awards/index.htm

b) Travelling Fellowship
Nominations are invited for the 2011 Selby Fellowship in all fields of science.

Applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Tuesday 24th August 2010.

Website: http://www.science.org.au/awards/awards/selby.html

c) Research awards
- Margaret Middleton Fund for Endangered Australian Vertebrate Animals
- W H Gladstones Population and Environment Fund
- J.G. Russell Awards (basic research)
- The Moran Award for History of Science Research

Applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Tuesday 24th August 2010.

Website: http://www.science.org.au/awards/research-award.html

d) Research Conferences
Expressions of Intent to hold a 2011/12 conference are also invited for the following:
- Boden Research Conferences in the biological sciences
- Elizabeth and Frederick White Conference in the physical sciences
- Fenner Conference on the Environment

Applications close on Tuesday 31 August 2010. Conference applications do not need to be submitted via ORD.
Website: http://www.science.org.au/awards/research-conferences.html

Email for further information: awards@science.org.au

2. AUSTRALIA - ISRAEL SCIENTIFIC EXCHANGE FOUNDATION (AISEF) POSTGRADUATE FELLOWSHIP
Please see this opportunity directed at promoting scientific exchange and collaboration between Israel and Australia.

The AISEF Postgraduate Fellowship Scheme provides funds to assist a student enrolled in a postgraduate research degree in an Israeli university to spend up to 6 months working in a research laboratory in Australia.

Funds are also available to assist a student enrolled in a postgraduate research degree in an Australian university to spend up to 6 months working in a research laboratory in Israel.

Applications to be administered by Curtin to are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Friday 30th July 2010.
Full information on the AISEF Fellowship Scheme is available from the following website: http://www.swinburne.edu.au/hosting/aisef//

The contact officer for queries in relation to the scheme is Ms Sara Jervis on 61 3 9214 8899 or email Sara sjervis@swin.edu.au

3. WATER QUALITY RESEARCH AUSTRALIA (WQRA) PhD & HONOURS PROJECTS COMMENCING 2011
SUMMER PROJECTS COMMENCING NOVEMBER 2010
WQRA invites submissions of project proposals for the 2011 Initiatives. All WQRA Member organisations are eligible and in particular Industry Members are encouraged to propose projects, in conjunction with a WQRA Research Member. The Education Program Initiatives ensure continual development of skills and knowledge enhancement for students within the Water Community.

WQRA project proposals should address priority research issues and enable students to build skills in problem identification, research skills and professional development in a wide range of water industry related areas.

Policy and Procedure Guidelines have been developed to clearly define the funding and assessment process. These documents and relevant forms are now available on the website. Please note International Students are now eligible for WQRA PhD Scholarships.

Applications for PhD Scholarships are to be submitted to the Scholarships Office within the Office of R&D no later than Friday 23rd July 2010.

Applications for Honours projects where the funds will be administered through a Curtin cost centre, are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Friday 23rd July 2010.

4. GEORGINA SWEET POST DOCTORAL FELLOWSHIP
This $6,000 fellowship is available to women postgraduates enrolled in or accepted by an Australian university for advanced post-first degree study or research in any field. Applicants must be a financial member of a National Federation or Association of the International Federation of University Women or an independent member of IFUW.

Applications for Honours projects where the funds will be administered through a Curtin cost centre, are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Friday 24th September 2010.

For more information please see http://www.afuw.org.au/ScholarshipsFS.htm or contact Marion Jones, AFGW Fellowships Officer, PO Box 479, Everton Park, Qld 4053
Email: jones.AFGW@gmail.com

HEALTH SPECIFIC

1. CANCER COUNCIL WESTERN AUSTRALIA SUZANNE CAVANAGH EARLY CAREER INVESTIGATORS GRANTS 2011
Cancer Council Western Australia aims to minimise the effect of cancer on our community through advocacy, research, education and by providing people affected by cancer with support to enhance their quality of life.

Applications are being sought for the Suzanne Cavanagh Early Career Investigator competitive cancer research grants. The purpose is to assist talented researchers at the early stage of their career to develop and advance their cancer related research skills and the track record necessary to become competitive in national research grant processes.
A maximum of four grants of up to $25,000 are available to new investigators who have no more than 5 years post doctoral experience.
Applications from all areas of cancer research (including psychosocial and quality of life research) are encouraged.

**Applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Friday 30th July 2010.**

For application forms and guidelines see [http://www.cancerwa.asn.au/research/funding](http://www.cancerwa.asn.au/research/funding)

---

### 2. HEALTHWAY SCHOLARSHIPS AND FELLOWSHIPS NOW OPEN

Please be advised that Healthway 2010 scholarship and fellowship details are now available on Healthway’s website.

The following scholarships and fellowships are available:

- Health Promotion Research Training Scholarships
- Indigenous Research Training Scholarship

**Applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Monday 2nd August 2010.**

Expressions of Interest (EOIs) are also open for the:

- Health Promotion Development Program - Visiting Fellow

**EOIs are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Friday 16th July 2010.**

---

### 3. NATIONAL BREAST CANCER FOUNDATION NOVEL CONCEPT AWARD – NOW OPEN

Following the earlier call for applications to Think Tank, Postdoctoral Training Fellowship and Early Career Fellowship, NBCF is delighted to announce the submission opening to the NBCF Novel Concept Award.

The Novel Concept Award is a unique funding opportunity created in an effort to support new ideas and encourage the development of innovative, potentially beneficial but high-risk avenues of investigation. It is a two-year, up to $200,000 award.

The awards will provide investigators with the opportunity to pursue serendipitous observations and/or explore new, untested ideas relevant to breast cancer. The project will have the potential for advancing scientific knowledge and/or breaking new theoretical ground and/or challenges previously reported understandings. It is anticipated that research completed through a NBCF Novel Concept Award may provide sufficient preliminary data to enable the investigator to prepare a hypothesis-based proposal for future funding applications.

Applications must be on an entirely novel and highly innovative proposal. Existing research projects will not be considered. Please do not apply if you intend to use the funds for a pilot study of an existing project or idea.

Applications will be reviewed primarily on the unique and innovative nature of the concept and not based only on your track record. Applicants with less research experience or with previous research experience that is outside breast cancer, but with conceptually valid proposals, are encouraged to apply providing they can demonstrate adequate scientific support from experienced researchers in the area and the necessary administrative support of their institution.

**EOIs are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Friday 16th July 2010.**

Please [click here](http://www.research.curtin.edu.au) for more details including the Guidelines and Application Form.
4. POSTDOCTORAL FELLOWSHIP FOR TRAINING IN CANCER RESEARCH 2011-2012

Applications for a training fellowship in 2011-2012 are invited from postdoctoral scientists who are Australian nationals, who intend to pursue a career in cancer research and wish to complete their training in those aspects of cancer research related to the Agency’s mission and of priority for the Cancer Council Australia: to coordinate and conduct both epidemiological and laboratory research into the causes and prevention of cancer. Disciplines covered are: epidemiology (including genetic and molecular), biostatistics, bioinformatics, and areas related to mechanisms of carcinogenesis including molecular and cell biology, molecular genetics, epigenetics, and molecular pathology. There is an emphasis on interdisciplinary projects.

The Fellowship is tenable at the International agency for Research into Cancer (IARC) in Lyon, France working in a research Group. The fellowship is for a period of one year, with the possibility of an extension for a second year subject to satisfactory appraisal. Candidates are required to have spent less than five years abroad (including doctoral studies) and have finished their doctoral degree within five years of the closing date for application or be in the final phase of completing their doctoral degree (M.D. or Ph.D.). The working languages at IARC are English and French. Candidates already working as a postdoctoral fellow at the Agency at the time of application or who have had any contractual relationship with IARC during the six months preceding the application deadline or who have already spent more than one year at IARC cannot be considered. Candidates must contact the host Group of their choice at IARC before application in order to interact closely to establish a proposed programme of mutual interest. Contact with the Group Heads can be made through the Agency’s web site: http://www.iarc.fr

The fellowship must be taken up by 30 November 2011. The annual stipend is currently 31 860 Euros. The cost of travel for the Fellow, and in certain circumstances for dependants, will be met, a dependant's allowance paid, and health insurance covered.

Applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Tuesday 23rd November 2010.

For more information please see – http://www.iarc.fr/en/education-training/iarcaustralia_postdoc.php

5. THE COOPER MEDICAL RESEARCH FOUNDATION GRANTS AND PHD SCHOLARSHIPS

The Rebecca L. Cooper Medical Research Foundation is a private, self funded medical research body whose resolve is the promotion and encouragement of medical research into all fields of the medical sciences, throughout Australia. The Foundation meets its goals by annually giving research grants within an ever widening group of research categories that it decides to support.

The Foundation has a personal approach towards the granting of research funds and this is appreciated by their recipients. Applications are invited for medical research grants to be awarded at the Foundation’s 27th Annual Dinner to be held in late March 2011. The value of the individual grants is between $8,000 and $22,000 and is primarily for equipment related to research projects. Grants will only be awarded in the fields notified; Brain Sciences, Diabetes, Geriatrics, Lung Disease (other than cancer), Rheumatology, Vision Sciences and the medical application of Genetic Research.

Applicants are asked not to submit more than one application per year, nor should more than one of a group of researchers apply per year, for instance a group of four researchers putting in four applications, switching Chief Investigators. This will NOT maximise your chances and may prejudice your application.

Applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Friday 1st October 2010.

PhD Scholarships

The Rebecca I Cooper Medical Research Foundation awards several PhD scholarships in the fields of research supported by the grants programme. Students are not able to apply directly for these scholarships, as the Board of Directors award each scholarship to the researcher. Each scholarship is granted to the researcher considered by the Board to be the most innovative or obtaining the highest cumulative score in the particular category for which the scholarship is to be awarded. The successful PhD student is then selected and supervised by that researcher.

For more information and application forms, please see - http://cooperfoundation.org.au
6. GRANTS FOR RESEARCH INTO MOTOR NEURONE DISEASE IN 2011

Researchers working in Australia in fields that are relevant to motor neurone disease are invited to apply for funding to support research in the calendar year 2011.

In general, the proposal should be consistent with the standards of the National Health and Medical Research Council (NHMRC). Funding decisions will be made by the Institute’s Research Committee at a Grants Allocation Meeting to be held on 25 October 2010.

Research grants allocated by the MND Research Institute of Australia are mostly grants-in-aid and postdoctoral fellowships. A PhD Scholarship, commencing 2011 will also be offered in partnership with NHMRC.

Grants-in-Aid for research into motor neurone disease in 2011

The MND Research Institute of Australia regards its role as one of providing seed-funding for research that is innovative and having a clear relationship to the causes, treatments and cures of MND or the support of people living with MND. Accordingly, the majority of funds available through the Institute are for grants-in-aid of MND research in Australia. Some of the grants-in-aid are awarded as named grants with funding provided by sponsors. Some of these grants have special conditions:

i. Charles & Shirley Graham MND Research Grant for scientific research relevant to the cause, treatment or cure of motor neurone disease.

ii. Mick Rodger Benalla MND Research Grant for research into cause, treatment or cure of MND in basic or applied science. Part of the funding must be used to attend the International Symposium on ALS/MND in Sydney, Australia, 30 November - 2 December 2011.

iii. MND Victoria Research Grant for applied research into MND, including social research. Part of the funding must be used to attend the International Symposium on ALS/MND in Sydney, Australia, 30 November - 2 December 2011.

iv. Peter Stearne Grant for Familial MND Research for a project investigating the genes responsible for familial MND.

v. Roth Foundation Grant for MND Research for scientific research relevant to the cause, treatment or cure of motor neurone disease.

vi. Zo-eè MND Research Grant for research into cause, treatment or cure of MND in basic or applied science. Part of the funding must be used to attend the International Symposium on ALS/MND in Sydney, Australia, 30 November - 2 December 2011.

Applications for grants-in-aid up to a maximum value of $100,000 will be considered. Fourteen grants-in-aid were awarded for 2010 with an average value of about $32,500.

As the International Symposium on ALS/MND will be held in Sydney in 2011 from 30 November to 2 December, all MND researchers and grant recipients in Australia are encouraged to attend.

Applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Friday 26th August 2010.

For more information please see - http://www.mndresearch.asn.au/grants_in_aid.html

SEMINARS, CONFERENCES, TRAINING AND INFORMATION

1. 2010 NHMRC PROJECT GRANT APPLICATIONS – ASSESSOR COMMENTS OUT SOON

The NHMRC have advised that assessor comments for applications submitted via the Project Grant process will start to be released via RGMS over the four week period from Monday 28th June to early August. An email will be sent to the first named Chief Investigator (CIA) so it is advisable that all CIAs monitor their email account until the applicant response is received.

Applicants will have seven days to provide their rebuttal. The rebuttal needs to be submitted via RGMS.

In the meantime, ORD will be sending instructions on how to access assessor comments and submit a rebuttal to the CIA.
2. SEMINAR – HOW TO LAY PEOPLE UNDERSTAND THE RISK OF DEVELOPING CANCER?
You are invited to a workshop on how lay people conceptualise cancer risk, to be held in Perth in July. The Centre for Values, Ethics and the Law in Medicine and Sydney School of Public Health, The University of Sydney, invite you to attend a workshop.

How do lay people understand the risk of developing cancer?
Date: Thursday 15th July 2010
Time: 2:00-5.00 pm
Venue: Conference Centre St John of God Hospital Subiaco Clinic
25 McCourt Street, Subiaco WA 6008
Synopsis: In this workshop, we will discuss the findings of a NHMRC funded qualitative study which compared community risk understandings with the risk definitions common in cancer control policy. With your help, we will consider how these findings might be applied in cancer control and other health promotion interventions.
Speaker: Dr Claire Hooker, Senior Lecturer, Medical Humanities, Centre for Values, Ethics & Law in Medicine (VELIM), The University of Sydney
Cost: free; refreshments provided
Program will be available soon
RSVP: Email claire.hooker@sydney.edu.au by Friday 2nd July 2010

3. INTERNATIONAL CONFERENCE ON HEALTH, WELLNESS AND SOCIETY
The International Conference on Health, Wellness and Society will be held at the University of California at Berkeley, CA, USA, from the 20th to 22nd of January 2011.

This conference will address contemporary challenges of health and wellness from interdisciplinary perspectives. Areas of concern include preventative medicine, public health, proactive wellness and the relationships of social and personal wellbeing to health.

Disciplinary perspectives include public health, medicine, nursing, pharmacology, nutrition, physical and health education, psychology, social work, sociology and communications.

Deadlines will be announced on the conference website, after this date. Papers and proposals will be reviewed within two weeks of submission.

For full details of the conference, including an online proposal submission form, please visit the website http://health-conference.com

4. THE KUWAIT PIPELINE TECHNOLOGY CONFERENCE & EXHIBITION
The Kuwait Pipeline Technology Conference & Exhibition will be held at the Hilton Hotel in Kuwait on the 6th and 7th of October 2010. This is a new international platform for products, systems and services relating to the transport of oil, gas and water. The focus will be on the entire value added chain – from planning, construction and operation to maintenance and repair. All these aspects will be discussed during the conference. It will provide participants with practical solutions for effective planning, design, construction, operation, corrosion, mitigation and maintenance strategies applied to state-of-the-art pipeline networks. The conference will go beyond the obvious, presenting detailed information and techniques much needed to overcome the most pressing challenges in overcoming effective planning and management of pipeline systems.

The main objective of the event is to share technological advances, operational experiences and to present important ongoing pipeline projects. It also aims to integrate companies that act in different segments of the pipeline industry: operation, construction, engineering, research and development, training and equipment suppliers. The conference will feature lectures and presentations by major oil & gas companies, utility providers, engineering firms, transport operators, industry associations, industrial providers and users on all aspects surrounding pipeline systems.

For more information please see - http://www.kuwaitpipetech.com/
5. FIRST AUSTRALIAN EARTH SYSTEM OUTLOOK CONFERENCE
The National Committee for Earth System Science of the Australian Academy of Science is hosting the First Australian Earth System Outlook Conference from 9 & 10 December, 2010 at the Shine Dome in Canberra. The Keynote Speaker is Professor Johan Rockström, from the Stockholm Resilience Centre, Sweden (http://www.stockholmresilience.org/contactus/staff/rockstrom.5.aeea46911a3127427980005551.html).

This First Australian Earth System Outlook Conference will explore a range of major Earth system issues that are directly pertinent to Australia. It is anticipated that this conference will set the scene for enhancing future collaboration of natural and social sciences to encourage understanding of different perspectives of global change problems and provide a forum for broad ranging interaction and networking opportunities.

Major human impacts on global systems are now unavoidable, meaning that well-informed, integrated management of the Earth system is a great challenge for global governance of the 21st century. During this conference the science behind the issues and stakeholder perspectives on information needs for addressing them will be highlighted.

For more detailed information please see the attached flyer. The conference is open to all who are interested. The first 40 PhD students to register will receive free registration.

6. CURTIN RESEARCH FORUM
The DVC, Research and Development invites you to participate in the 2010 University Research Forum on Monday 30 August 2010. The aims of the Research Forum are to discuss research developments and initiatives within the University in relation to external opportunities and challenges as we plan for 2011. We are delighted that our Chancellor, Dr Jim Gill will give the opening address.

We are also pleased that Dr Thomas Barlow will provide a keynote address on the topic ‘Research at Curtin – An Outsider’s Perspective’ and that Professor Les Oxley will lead a panel discussion on ‘Publications and Citations’:

Thomas Barlow is a prominent thinker and speaker who provides imaginative and rational advice on R&D strategy to universities, high-tech companies, and governments. He publishes a major study on The State of Research in Australian Universities, the second edition of which was released in late 2009. He has been a columnist with the Financial Times newspaper in London, a science advisor to a former federal Minister for Education, Science and Training, and a research fellow at Oxford University and MIT. He is also the author of The Australian Miracle, published by Picador, an influential book about Australian innovation.

Les Oxley FRSNZ, FMSSANZ, FIEMSS is Professor in Economics, Department of Economics and Finance, University of Canterbury and Adjunct Professor in the School of Economics and Finance at Curtin University. His current research includes; defining and measuring the size, scale and effects of the ‘knowledge economy’ in New Zealand; measures and effects of innovation on the New Zealand economy in the late 19th/early 20th century; latent variable-based measures of human capital. His expertise in understanding the publication process and the citation exercise will be particular valuable in our discussions on this topic.

The format of the Forum will be collegial and open, encouraging active and constructive discussions about how to build our research capabilities at Curtin. Academic and professional staff are welcome as well as those with a strong research program and those who may be new to research, so do put this in your diary and plan to attend.

The Forum will be held on the Curtin Bentley campus. Travel and accommodation for staff living outside of Perth will be covered. Meals and registration for the conference will be complimentary for all attendees. A draft outline of the Forum Program will be available soon.

There are a limited number of places available – click on the link below to download and submit your registration form. http://research.curtin.edu.au/about/events.cfm#symposium. ORD will contact you by 6 August to confirm your place and to discuss travel details if applicable.

There is also the opportunity for display of research area brochures at the Forum. If your area is interested in providing such brochures, please ensure that these are delivered to the office by no later than Monday 23 August 2010 (please make them 'Attention: Jo Clements, ORD Research Forum').

For further information regarding the Forum, please contact Mr Tony Tate, Director, Research & Development: t.tate@curtin.edu.au.

First Australian Earth System Outlook Conference

9 – 10 December, 2010
Shine Dome, Australian Academy of Science, Canberra

Background

Human activities have become so pervasive and profound since the industrial revolution that they are affecting the functioning of the entire planet - changing the composition of the atmosphere, waters and soils, modifying the energy balance at the Earth’s surface and, consequently, climatic patterns; acidifying land and sea; reducing the diversity of the biosphere and raising sea level. We have entered the “Anthropocene”. This new epoch is changing the continued provision of ecosystem services. It carries risks of abrupt and/or irreversible environmental changes, such as deglaciation of the Arctic and parts of the Antarctic, which could have deleterious and even catastrophic repercussions for contemporary human civilization. Continuing major human impacts on global systems are now unavoidable, meaning that well-informed, integrated management of the Earth system is a great challenge for global governance of the 21st century. Earth System Science (ESS) is an emerging, highly interdisciplinary, quantitative and rigorous research area that aims to (i) understand how the Earth system works, including the role of humans as an integral part of the system; and (ii) provide the knowledge required for humanity to thrive in the 21st century and beyond by maintaining a well-functioning and resilient Earth system.

This First Australian Earth System Outlook Conference, open to all, will explore a range of major Earth system issues that are directly pertinent to Australia. Delegates will hear both the science behind the issues and stakeholder perspectives on information needs for addressing them.

The Australia-focussed Earth system issues to be addressed are drawn from The Australian plan to develop a science of the contemporary Earth system that is under development by the National Committee for Earth System Science for the Australian Academy of Science.

Topics to be covered include issues of regional climate change, sustainable food production, national water resources, biodiversity decline, land use planning and land tenure, sea-level rise repercussions, ocean acidification issues, human health, geo-engineering options, low C energy futures, and human population size. These topics will be dealt with by a keynote presentation followed by brief responses by speakers holding different views from the main speaker and open discussion.

Conference Keynote Speaker

Prof Johan Rockström, Stockholm Resilience Centre, Sweden.

Posters

There will be opportunity to present posters on Earth System Science results and issues.

For further detail see the second circular in due course or see www.science.org.au/natcoms/nc-ess.html
First Australian Earth System Outlook Conference
9 – 10 December, 2010
