FUNDING OPPORTUNITIES

GENERAL
1. National Vocational Education and Training Research and Evaluation Program (NVETRE)
2. Round Four of the Australia-India Strategic Research Fund Is Now Open
3. Dairy Innovation Australia Processes and Products Research Grants
4. Postdoctoral and Invitational Fellowships in Japan 2010
5. 2009-10 and 2010-11 Anti-Doping Research Program Funding Rounds

HEALTH SPECIFIC
1. NHMRC Project Grant Expressions of Interest Sought
2. Healthway Applications Now Open
3. Australian Rotary Health Research Fund Phd Scholarship in Melanoma Research
4. Early Notice Leukaemia Foundation Grants

SEMINARS, CONFERENCES, TRAINING AND INFORMATION
1. Reminder - NHMRC Annual Progress Reports For 2010
2. Appointment to NHMRC of Senior Scientist Public Health
3. Seminar – Cancer Australia Research Funding: Recent Trends and Future Opportunities
4. Financial Support for Conference Organisers
5. ORD Research Training Seminars

HELP, TOOLS AND TIPS
Please see this section for useful contacts, tools and tips.

EXPRESSIONS OF INTEREST FOR NHMRC PROJECT GRANT APPLICATIONS IN 2010 ARE DUE ON 20TH JANUARY
See below for more information
FUNDING OPPORTUNITIES

GENERAL

1. NATIONAL VOCATIONAL EDUCATION AND TRAINING RESEARCH AND EVALUATION PROGRAM (NVETRE)
NCVER invites researchers with innovative ideas to submit a proposal for funding. The national VET research program is informed by a set of priorities (see http://www.ncver.edu.au/research/priorities.html for the 2007-2010 priorities). In addition to commissioning research against the priorities, from time to time NCVER also advertises an open funding round to support research on emerging issues.

Projects should be relevant to the contemporary education and training environment and focus on research that is pertinent to policy and how the tertiary education sector operates.

In framing a project, applicants should keep in mind that NCVER’s remit is to produce research that informs vocational education and training policy and practice. Proposals that promise fresh thinking and pose concrete questions will be favourably considered, as will those that bring a diversity of expertise to the project.

NCVER is also keen to encourage collaborative proposals involving researchers from a wide range of disciplines and from both within and outside the VET sector.

Funding for several research projects in the vicinity of $100,000 per project is available through a competitive selection process.

Applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Monday 14th December 2009.

For more information please see: http://www.ncver.edu.au/newsevents/tenders.html#Current_funding_round

2. ROUND FOUR OF THE AUSTRALIA-INDIA STRATEGIC RESEARCH FUND IS NOW OPEN
Round 4 of the AISRF is now open. The Australia-India Strategic Research Fund (AISRF) is a joint initiative between the Australian and Indian Governments.

The AISRF supports Australian researchers, from both the public and private sectors, to collaborate with Indian partners on leading edge science and technology (S&T) in order to contribute to Australia’s economic, social and environmental wellbeing.

The objectives of the AISRF are to:
- Increase the uptake of leading edge S&T through:
- Supporting collaboration and participation by Australian researchers in strategically focussed, leading edge, scientific research and technology with Indian counterparts; and
- Increased strategic alliances between Australian and Indian researchers.
- Facilitate Australia’s access to the global S&T system by supporting bilateral relations with India.

Round Four of the AISRF will comprise two components:
- Indo-Australian Fund for Scientific and Technological Cooperation (Indo-Australian S&T Fund); and
- Indo-Australian Fund for S&T Cooperation in Biotechnology (Indo-Australian Biotechnology Fund).
Support is provided under these elements for bilateral collaborative research projects or workshops.

Please note that, although the application process for the Indo-Australian S&T Fund and the Indo-Australian Biotechnology Fund are identical, these components cover different priority areas and the applicant must make it clear under which element and priority area of the fund they are applying.

Applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Thursday, 17th December 2009.

Guidelines for Round 4 detailing the level of funding available, eligible expenses, and the application process, are now available on the AISRF website at https://grants.innovation.gov.au/AISRF/Pages/Guidelines.aspx.

Should you have any questions regarding the online application form or the guidelines, please contact the AISRF information line on (02) 6276 1468 or email us at: aisrf@innovation.gov.au

3. DAIry Innovation AUSTRALIA PROCESSES AND PRODUCTS RESEARCH GRANTS

Dairy Innovation Australia Limited is calling for applications from researchers for its Processes and Products Grants for research and innovation. Proposed projects should be targeted to provide research solutions in line with DIAL strategic objectives and current priorities.

Dairy Innovation Australia invests in and manages research projects that are in line with its strategic objectives:

- to shape and contribute to the future commercial success of Australian dairy manufacturing.
- to create and support the timely development, commercialisation and operation of smarter dairy manufacturing processes.
- to provide knowledge that supports the timely creation of higher returning products faster by dairy company members.

Applications are invited in any related research area. However, priority areas for this round of applications are:

- Cheese, fermented dairy foods and cultures – future processes and product innovations.
- Thermal and non-thermal processing of milk.

A minimum of $200,000 in funding is available in each year of this program. Funding will be considered for projects on any scale within the program budget. Please direct enquiries to Karen Manaszczuk on (03) 9974 8703 or kmanaszczuk@dairyinnovation.com.au

Applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Monday 14th December 2009.

Follow this link to see requirements and application details.

4. POSTDOCTORAL AND INVITATIONAL FELLOWSHIPS IN JAPAN 2010

The Australian Academy of Science, in association with the Japan Society for the Promotion of Science (JSPS), invites applications from Australian researchers to undertake Postdoctoral and Invitational Fellowships in Japan. Postdoctoral Fellowships are for a period of twelve to twenty-four months; Invitational Fellowships are either short term, for fourteen to sixty days, or long term, for two to ten months.

Researchers in any field of natural sciences, including technology, engineering and medicine may apply.

Applications in the humanities and social sciences are also accepted but ONLY for the Postdoctoral Fellowships. Medical doctors without a doctorate are not eligible to apply for the Postdoctoral Fellowship.

Applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Friday 29th January 2010.

Please see the website for information and guidelines.

5. 2009-10 AND 2010-11 ANTI-DOPING RESEARCH PROGRAM FUNDING ROUNDS
The Australian Government’s Anti-Doping Research Program (ADRP) offers funding for new research to improve the analytical capability for detecting banned substances and doping agents taken by athletes and to help lead to practical doping deterrence strategies.

The Australian Government Department of Health and Ageing is seeking applications for ADRP funding for 2009-10 and 2010-11 in the areas of:

1. Detection of gene doping and gene manipulation by identification of molecular signatures associated with gene transfer vectors, gene products or biological markers.

2. Detection of novel substances with suspected doping potential, including:
   - new drugs; or
   - novel substances with clinical or field evidence of abuse for doping purposes; or
   - new or improved methods, including those based on indirect markers of doping (for example, biochemical variables or gene expression).

3. Improved detection of Prohibited Substances and Methods using gas or liquid chromatography, mass spectrometry, non-invasive imaging, immunological and/or biochemical methodologies.

4. Social science research in the area of:
   - causes of doping behaviour and of risk and protective factors, with a junior elite level or sport specific focus; or
   - evaluating anti-doping interventions; or
   - the optimal design and effectiveness of anti-doping educational interventions, with a possible focus on strategies for team sports vs individual athletes; or
   - improving social science research on doping prevention, such as design and validation of measurement tools, behavioural models or cultural and religious perspectives.

Proposals outside these priority areas are also invited if they demonstrate a very strong contribution to the aims of the Anti-Doping Research Program and excellent value for money.

Applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Wednesday 27th January 2010.

Further information on the 2009-10 and 2010-11 ADRP Funding Rounds, including the funding round guidelines, can be found at www.health.gov.au/tenders (ITA 181/9810).

6. PERPETUAL TRUSTEES AUSTRALIA LIMITED PHILANTHROPIC FOUNDATIONS GENERAL GRANTS/GIFTS
Perpetual Trustees Australia are the trustees for a number of charitable trusts and foundations. Please note that these trusts and foundations are not specifically research focussed, but some may consider a research project if it is in line with their goals.

As part of the assessment process, PTA will match your organisation to all appropriate trusts and foundations. They manage are distributed according to the terms of the founding document, eg, a will or trust deed. In most cases, restrictions are placed on the trustee to provide funds:
- to a specific type of organisation,
- for a specific cause or purpose, or
- to a specific geographical area.

You do not need to direct your application to a specific trust.
To meet the requirements of the trusts and foundations managed which have specific funding criteria, applications are sought for the following purposes or in the following regions:

1. Aid and support for people with disabilities
2. Blind and vision impaired people
3. Animal welfare and the preservation of animal wildlife
4. Care, welfare and education of children
5. Education, early intervention and rehabilitation of disadvantaged young people
6. Medical research and advancement of medical science
7. Assistance for the homeless and families living in poverty
8. Support for the aged
9. Social and educational advancement of Tibetan Buddhism
10. Organisations working within the Jewish Community
11. Myeloproliferative disease
12. Lupus
13. Parkinson's disease

Applications which fall outside these areas (for example in the arts and environmental sectors) are eligible for funding from PTA-managed trusts and foundations that support general charitable purposes.

**Specific regions**
- NSW: Gilgandra and Warren shires, Taree, within a fifty mile radius of Matong
- Queensland: Toowoomba and Darling Downs, Northern Queensland
- Victoria: Ballarat, Benalla, Geelong

As a guide, gifts generally range between $10,000 and $100,000. In 2009, the average gift was approximately $50,000. The maximum amount an organisation can request is $300,000.

**Applications are to be submitted to the Office of Research and Development, along with a completed Research Project Application Tool (RPAT), preferably generated via SCRIPT, no later than Friday 29th January 2010.**

---

**HEALTH SPECIFIC**

**1. NHMRC PROJECT GRANT EXPRESSIONS OF INTEREST SOUGHT**

The Office of Research and Development (ORD) is now calling for Expressions of Interest (EOIs) from researchers who are intending to submit an NHMRC Project Grant application in the 2010 round for funding in 2011 where Curtin will be the lead organisation.

Curtin is keen to improve the success rate of Project Grant applications and the EOI process is designed to assist with this objective.

**To lodge an EOI please complete the EOI form and submit it to your Faculty Dean of Research no later than Wednesday 20th January 2010.**

EOIs received by the due date will be reviewed by the Faculty Dean of Research with feedback provided to applicants including suggestions of ways to strengthen the application. Some applicants may be encouraged to postpone their application until another round if it is considered that extra developmental work would make the proposal more competitive.

Please note that applications for NHMRC Project Grants will require the support of the Faculty Dean of Research prior to submission to the NHMRC. The Dean will advise ORD by no later than February 8th 2010 of those applications supported.

During the Eoi process applicants should continue the development of their application in anticipation of a positive outcome.

For more information on Research at Curtin please visit the research website [www.research.curtin.edu.au](http://www.research.curtin.edu.au)
Funding Rules and Instructions to applicants for the 2010 round (for funding to commence in 2011) are unfortunately yet to be released by the NHMRC but it is anticipated that they will be released in the coming weeks and will not differ significantly from those for funding commencing in 2010. ORD will advise when the Advice and Instructions to Applicants and Funding Policy are available for NHMRC Project Grant applications for funding in 2011 and when the NHMRC’s new Research Grants Management System (RGMS) is open to commence the online application process.

2. HEALTHWAY APPLICATIONS NOW OPEN
Healthway applications are now open for the following schemes:

1. Health Promotion Research Project Grants
2. Health Promotion Research Starter Grants
3. Health Promotion Research into Practice Grants
4. Reducing Harm from Alcohol Special Research Initiative Expressions of Interest

If you are planning to submit a Healthway Starter Grant, Project Grant, Research into Practice grant or Reducing Harm from Alcohol Grant through Curtin in the 2010 round and have not already informed ORD, please advise Felicity Lonsdale as soon as possible by providing the following information:

• Investigators
• Draft project title
• Which of the four schemes you are applying to

Please ensure for Grants 1 - 3 that one hard copy of the full application is to be submitted to the Office of R&D, along with a Research Project Application Tool (RPAT) completed via SCRIPT for review no later than Wednesday February 10th, 2010.

For Expressions of Interest provide one hard copy of the EOI to the Office of R&D along with a Research Project Application Tool (RPAT) completed via SCRIPT and duly signed for review no later than Monday January 18th, 2010.

3. AUSTRALIAN ROTARY HEALTH RESEARCH FUND PHD SCHOLARSHIP IN MELANOMA RESEARCH
This opportunity is offered under ARHRF’s Funding Partner Program which is a three-way financial commitment between a co-funding Rotary Club or District, Australian Rotary Health and the administering university or research institute. We are currently funding 42 students Australia-wide with research funding totaling over $1,000,000 in medical and mental health research.

Application details will be available on the website www.australianrotaryhealth.org.au.

The closing date is Friday 11th December 2009.

4. EARLY NOTICE LEUKAEMIA FOUNDATION GRANTS
The Leukaemia Foundation is pleased to advise that it has partnered in the 2010 round of Cancer Australia’s Priority-driven Collaborative Cancer Research Scheme. Through this grants scheme the Leukaemia Foundation will support cancer research project grants in its identified research priority areas. The research priority areas of the Leukaemia Foundation and other funding partners, along with further information about how to apply for grants under this scheme can be found on the Cancer Australia website (www.canceraustralia.gov.au).

Relevant documentation, including application forms and instructions for applicants will be published on the websites of Cancer Australia and the National Health and Medical Research in December 2009, to coincide with the opening of the call for applications. The call for applications will close in early/mid February 2010.
Leukaemia Foundation
The Leukaemia Foundation's "Vision to Cure" is actively realised in their National Research Program (NRP). The NRP seeks to foster innovative research into the causes, diagnosis and treatment of blood cancers like leukaemia, lymphoma, myeloma and related blood disorders. The program includes grants-in-aid to provide seed funding for novel research projects, whilst the fellowships and scholarships program aims to encourage talented young scientists, medical graduates and researchers to pursue a career in basic, applied or translational research to find cures and better ways to care for patients and families living with haematological malignancies.

They will consider funding applications in all fields of research which will improve outcomes for people with blood cancers and related disorders.

In 2010 the following funding opportunities will be offered:

- **Grants-in-aid** (applications to ORD, with RPAT by 24th July 2010)
- **Senior Research Fellowship** (applications to ORD, with RPAT by 24th July 2010)
- **Post Doctoral Fellowship** (applications to ORD, with RPAT by 24th July 2010)
- **PhD Scholarships** (applications to ORD’s Scholarship Office by 18th September 2010)
- **PhD Scholarships (Clinical)** (applications to ORD’s Scholarship Office by 18th Sept 2010)
- **New Investigators Grant (WA)** (if funds are to be administered by Curtin then applications to ORD with RPAT by 23rd October 2010)

SEMINARS, CONFERENCES, TRAINING AND INFORMATION

1. **REMININDER - NHMRC ANNUAL PROGRESS REPORTS FOR 2010**
This is a reminder that annual written progress and financial reports for NHMRC grants are due in the Office of Research and Development by **Friday 12th March 2009**. Please note that if you hold an NHMRC fellowship you are also required to submit a financial report at this time even though your progress report may be due at a later date. More information on the relevant forms and requirements are available as set out below:

**Annual Progress Reports**

**Annual Financial Statements**

* Make sure you are using the latest excel version of the Financial Statement template as the old template is no longer in use.

Please contact your school administrative staff to organise the Financial Statements. These will need to be prepared by the school then submitted to Paige Rowling-Gill in Financial Services for sign off no later than **Friday March 5th 2009** prior to submission to ORD.

**Fellowship holders** - Please note, if you hold an NHMRC fellowship please check the agreement schedule to determine when your written report is due. Information on fellowship reports is available at -

2. **APPOINTMENT TO NHMRC OF SENIOR SCIENTIST PUBLIC HEALTH**
NHMRC is pleased to announce the appointment of Professor John McCallum as Senior Scientist Public Health, heading up the Health Evidence and Advice Branch from 1 February 2010.

Following the review by Professor Don Nutbeam last year the NHMRC has strengthened its capacity in public health through this new position based in the Canberra Office. Professor McCallum is currently Senior Deputy Vice-Chancellor at Victoria University and before that was Executive Dean of Health at University of Western Sydney.
3. SEMINAR – CANCER AUSTRALIA RESEARCH FUNDING: RECENT TRENDS AND FUTURE OPPORTUNITIES
Please see details below for a free seminar titled “Cancer Australia Research Funding: Recent Trends and Future Opportunities”

Thursday, 3 December 2009
5.00pm Welcome Refreshments
5.30-6.15 pm Meeting
Venue: Rottnest/ Garden Room, Esplanade Hotel, 54 Marine Tce, Fremantle
Presenter: Cleola Anderiesz, BSc (Hons), PhD, Grad Cert H.Ec
RSVPs: Venna Manricks Tuesday 1 December 2009 by email at andricks@cancerwa.asn.au or phone: 9212 4375

Cleola is the National Manager of Research and Clinical Trials at Cancer Australia. Cancer Australia is the Australian Government's national Cancer Agency established to reduce the impact of cancer in the community by providing national leadership and improving the coordination of cancer control. A laboratory scientist by training, Cleola has worked in cancer control for the last nine years in research, policy and program management. In her current role Cleola is responsible for overseeing a dedicated budget for research into cancer and implementing and managing programs to support cancer clinical trials in Australia.

Cleola’s presentation will outline the development, conduct and outcome, to date, of Cancer Australia’s principal research funding program - the Priority-driven Collaborative Cancer Research Scheme (PdCCRS). The different but complementary nature of the PdCCRS and the NHMRC’s project grant scheme will be discussed, and funding opportunities and the process of application to the PdCCRS will detailed.

4. FINANCIAL SUPPORT FOR CONFERENCE ORGANISERS
The Perth Convention Bureau provides financial support for people bidding to host, or simply organising, a national or international conference in Perth. There are no restrictions on who organises the conference, the minimum size for the conference or the venue or the conference.

This support is primarily in the attraction process – eg to bring key note speakers - but does extend to sponsorship of the event. In order to maximise opportunities it is imperative that the Bureau be involved at an early stage of conference planning.

If you would like to discuss this opportunity please contact Tony Tate (T.Tate@curtin.edu.au)

5. ORD RESEARCH TRAINING SEMINARS
A full list of training seminars provided by the Office of R&D are available at - http://research.curtin.edu.au/seminars/

The slides and lectures of most sessions can be found at - http://research.curtin.edu.au/seminars/notes.cfm

We wish to highlight the following session coming up:

Animal Ethics Committee Animal Welfare Training Module 1
Introductory course covering principles of biomedical ethics, legislation and institutional requirements governing the use of animals for research and teaching at Curtin University of Technology. Attendance of this module is compulsory for Curtin Staff and research students who conduct research or teaching involving animals on Curtin premises.

Date: Tuesday 1st December 2009
Time: 9:30am to 12:30pm
Synopsis: This is an Introductory course covering principles of biomedical ethics, legislation and institutional requirements governing the use of animals for research and teaching at Curtin University of Technology. Attendance of this module is compulsory for Curtin Staff and research students who conduct research or teaching involving animals on Curtin premises.

### TOOLS AND TIPS

**LINKS**

- Community of Science (COS)
  - [www.cos.com](http://www.cos.com) – for funding opportunities

**Research Project Application Tool (RPAT)**

**New Research Codes**

- The codes can be found on the [ABS website](http://www.abs.gov.au)
- You may also find the University of New England’s [Conversion Tool](http://www.une.edu.au) useful.

### TIP OF THE WEEK

**Preparing for RPI**

In preparation for RPI next year, it is important to ensure that all of your 2009 publications and research funding has been entered into the SCRIPT database. By entering them in before the end of 2009 the amount of work that needs to be done in the lead up to RPI claims will be reduced.

For more information on RPI please see -
